SOLO is constantly striving to provide the best educational experience possible. Your comments, criticisms and ideas are very important to us. Please give specific answers to these questions.

Did this course meet your expectations?

Absolutely and more. I really enjoyed the way the skills were taught from a practical hands on bases and the emphasis on skill development

What were the positive aspects of the course?

It greatly increased my understanding of various injuries, signs and symptoms and treatment, as well as the underlying causes - the why of the injury.

What could we do to improve the program?

Provide supplemental information in written or CD form in addition to the WFR manual that explains in more detail the signs/symptoms/treatment mechanisms - the whys of the injury - e.g. Instructor's notes on CD

What did you think of the instructors?

Fantastic! The Instructor - Matt did an unbelievable job in both explaining and demonstrating the mechanics of treatment and the whys of an injury or disease. This is very important because the manual does not readily address this in many places

Would you recommend this course to others?

Yes. My WFA only really scratched the surface. This course really drilled down in greater detail. I now feel far more confident in my skills and knowledge.

What other programs would you like to see us offer?

An advanced WFR somewhat below WEMT-13
