Did this course meet your expectations? Yes. Very much so. A great blend of solid medicine and physiology with practical applications for diagnosis and treatment.

What were the positive aspects of the course? The best part, from my perspective, was the balanced blend of learning/theory/application to many scenarios. The use of scenarios to illustrate was a real addition to learning reinforcement.

What could we do to improve the program? More 'scenario poloosas.'

What did you think of the instructors? Outstanding in every respect. Deeply knowledgeable, time sensitive, people sensitive, really interested in teaching and maximizing skill levels, great constructive criticism and teaching style.

Would you recommend this course to others? Without doubt.

What other programs would you like to see us offer? Wilderness EMT, GeoMedic

Thank You!

*

- it would be helpful if for every bigger scenario patients obtain a card with list of symptoms like for scenario palooza (but can be much shorter). It is difficult to remember all the stuff as patient, but can improve caregiver's experience during scenarios

- i was thinking it would be cool to give patients stickers to stick on the core with skin characteristics ex:

pale
cool
clammy

pink
warm
dry

etc
